

Jeffrey Obi

Cybersecurity Analyst | (+234) [redacted] | jeffrey.o.obi@gmail.com | [linkedin.com/in/jeffreyool/](https://www.linkedin.com/in/jeffreyool/)

Entry-level Cybersecurity Analyst with hands-on experience building and securing simulated enterprise environments using SIEM (Wazuh), AWS cloud monitoring, and endpoint security tools. Transitioning from a background in systems design and compliance, with a focus on threat detection, network security, and incident analysis while backed by robust homelab experience and industry-standard certifications (CompTIA Security+, ISC2 CC).

CORE COMPETENCIES

- **Security & Monitoring:** SIEM (Wazuh), EDR/XDR (Sophos Central), IDS/IPS, File Integrity Monitoring (FIM), Zero-Trust Architecture.
- **Cloud Security:** AWS (EC2, CloudTrail, CloudWatch, AWS Config, SNS, S3 Security, IAM, Lambda).
- **Network Security:** Network Architecture (Packet Tracer), VLANs, ACLs, Firewall/WAF configurations, VPN, DMZ.
- **Threat Intelligence & Analysis:** Packet Analysis (Wireshark, tcpdump), Phishing Analysis, Malware Tools (VirusTotal, CyberChef), OSINT.
- **Infrastructure & OS:** Linux (Kali, Parrot, Ubuntu), Windows Server 2022, Virtualization (VMware, VirtualBox), Cryptography (PKI, OpenSSL).

TOOLS

- Linux OS (Kali OS, Parrot Security OS, Ubuntu OS)
- VMware & VirtualBox
- Sophos Firewall
- Sophos EDR/XDR
- Wazuh
- AWS Cloud Services
- Cisco Packet Tracer
- Wireshark
- Tcpdump
- Thunderbird
- Python

CYBERSECURITY PROJECTS (HOMELAB EXPERIENCE)

Enterprise Security Architecture & Cloud Monitoring

- **Zero-Trust Network Design:** Designed a simulated multi-tier enterprise network architecture, implementing security devices, along with a cloud failover system.
- **AWS Security Automation:** Built and configured a continuous compliance and monitoring pipeline, in order to detect unauthorized access to sensitive resources and configured real-time email alerts which triggered upon simulated misconfigurations in under 30 seconds, all using AWS services.

SIEM Deployment & Endpoint Protection

- **Wazuh Integration:** Deployed Wazuh servers across cloud (AWS EC2) and local virtual machines (VMware). Configured endpoint agents to ensure policy compliance and logging and alerting.
- **Sophos Central Management:** Deployed a firewall virtual machine and secured gateways within an isolated lab environment. Configured Sophos Endpoint for Active Detection and Response (EDR), implementing firewall rules and web filtering policies.

Network Traffic Analysis & Threat Investigation

- **Packet & Traffic Analysis:** Utilized Wireshark and tcpdump to analyze HTTP/HTTPS and TCP connections, filtering packet data to successfully detect simulated DDoS attack signatures.
- **Phishing & Malware Analysis:** Conducted comprehensive analysis of malicious emails targeting organizational infrastructure. Utilized Thunderbird, CyberChef, VirusTotal, and python scripts to identify indicators of compromise (IOCs).

Secure Network Design & Cryptography

- **Enterprise Network Configuration:** Designed enterprise network topologies using Cisco Packet Tracer. Configured switches and routers, implemented secure remote access, established intra/inter-VLAN routing, and applied ACLs for strict communication permissions.
- **Cryptographic Implementation:** Simulated symmetric and asymmetric encryption within a Linux environment. Deployed a Public Key Infrastructure (PKI) and generated secure digital signatures.

PROFESSIONAL EXPERIENCE

Independent Cybersecurity Projects, Nigeria — *Cybersecurity Professional (Freelance)*
June 2025 - Present

- **Application Security & Development:** Built and managed a web-based cybersecurity study tool using HTML, Firebase, and APIs.
- **Network Infrastructure:** Designed and deployed segmented home and small-office networks with VLAN isolation and secure access controls.

Dakboss Construction Ltd, Lekki Phase I, Lagos — *Designer*
April 2024 – Present

- **Dynamic Technical Direction:** Translated client requirements into detailed technical blueprints, dynamically adjusting system designs to account for resource limitations, vendor capabilities, and regulatory standards.

Greenville Liquefied Natural Gas Co. Ltd, Victoria Island, Lagos — *Technical Designer*
June 2019 – September 2022

- **Systems Engineering & Compliance:** Supported 45 large-scale infrastructure projects with a focus on systems design and compliance. Ensured adherence to regulatory standards, safety protocols, and risk mitigation practices.

Joe Faraday Limited, Banana Island, Lagos — *Compliance Officer*
February 2019 – June 2019

- **Policy Auditing:** Audited 6 production sites to ensure rigorous compliance with internal execution policies, significantly reducing operational and non-compliance risks.

T.E.A.M (Nigeria) Ltd, Garki, Abuja — *Assistant Technical Designer*
December 2013 – July 2015

- **Infrastructure Design & Administration:** Assisted in infrastructure design and execution for engineering projects. Ensured alignment between technical specifications and implementation.

CERTIFICATIONS

- **CompTIA Security+**
March 2026
- **ISC2 Certified in Cybersecurity**
October 2025
- **Google Cybersecurity Professional Certificate**
September 2025
- **Fortinet Certified Fundamentals: Cybersecurity**
November 2025

EDUCATION

- **AltSchool Africa, Nigeria** — *Diploma in Cybersecurity*
July 2025 - June 2026
- **Covenant University, Nigeria** — *Master of Science in Architecture*
August 2016 - July 2018
- **Kwame Nkrumah University of Science and Technology, Ghana** — *Bachelor of Science in Architecture*
August 2008 - December 2012
